Availability:

Available to all commercial and industrial consumers with installed transformer capacity, by West Oregon Electric Cooperative, over 45 KVA.

Character of Service:

Three-phase, sixty hertz, alternating current at a nominal 120/208 volts, 120/240 volts, 240/480 volts or 277/480 volts when available from existing facilities.

Monthly Charges:

<tr>
<td></td>
<td>Over 25 kW</td>
<td>$9.00/KW</td>
</tr>
</tbody>
</table>

Minimum Bill:

Base charge plus energy charge plus demand charge plus adjustment for power factor.

Primary Service Discount:

For consumers taking service at the primary distribution voltage and who own and maintain the transformers, switches, protective equipment, and other items necessary for service, the above demand and energy rate shall be reduced by 5 percent.

Determination of Demand:

Billing demand for each month shall be the maximum 30 minute demand for the month.

Adjustment of Demand for Power Factor:

If the average power factor at which power is delivered to the member is less than 97% the billing demand shall be increased by one percent for each percent or major fraction thereof that the average power factor is less than 97%. The average power factor will be determined by measurement of kilowatt hours and reactive kilovolt-ampere hours during the billing period using the following formula:
\[ PF = \frac{kWh}{\sqrt{(kWh)^2 + (KVARh)^2}} \]

Where:

- \( PF \) = average power factor
- \( kWh \) = kilowatt hours
- \( KVARh \) = reactive kilovolt-ampere hours

**General Terms and Conditions:**

Delivery point, terms of payment and service under this classification are subject to the "Service Rules and Regulations" of West Oregon Electric Cooperative, Inc.

**Effective:**

On bills issued after February 1, 2020
